REGEN S-VIBE

Welcome to your beauty club!

Thank you for choosing this product! Our mission starts here. We want to help you take care of yourself and feel beautiful with simple means available in your home. Treat yourself to a comfortable facial treatment every day. Beauty treatment is easy! The feeling of a vibrant and healthy skin raises your self-esteem and makes you feel beautiful inside out. Embrace a daring and mindful approach in the present and in every step you take towards well-being and a successful life. We want you to dare to be You!

REGEN S-VIBE is the first product in our series of luxury beauty products for home use. We want to offer our customers products that are safe and effective. All our products have high quality and comply with the safety requirements of the European Union (CE-marking and RoHS compliance. The RoHS aims at reducing health and environmental risks by limiting hazardous chemical substances in electronic equipment.) In order to properly use and maintain this product, please read the user manual and save it for later reference. The content of this manual is for customer use only and has been carefully reviewed. If you have any questions or improvement proposals, please contact the REGEN service center.

FREQUENCY	6500-8500 vibrations per minute
SIZE	L75 x W 25 x H 80 mm
WEIGHT	69g

REGEN S-VIBE

WATERPROOF SILICONE

Your facial cleansing brush, made of waterproof medical silicone, is soft against your skin and easy to clean after every use. The material is hygienic, anti-allergic and has a long shelf life. Unlike other cleansing brushes, you do not need to change the head of REGEN S-VIBE.

MICRO VIBRATIONS

The facial cleansing brush uses micro vibration technology with a frequency of 6500 - 8500/ per minute. Vibrating small silicone bristles clean the skin deeply, while the brush massages and increases the circulation in deeper skin layers.

ADJUSTABLE INTENSITY

You can adjust the intensity of the vibrations with the (+) and (-) buttons located on the lower part of the device. Lower degrees of intensity (1-7) should be used for sensitive skin, for cleansing, and for massage/anti-age purpose. Higher degrees of intensity (8-14) can be used for normal to oily skin.

DESIGN OF BRUSH SHAPE AND BRISTLES

Silicone bristles of different size cover the front and back of the brush. For better comfort, you can choose different sides of the brush according to your skin type. Furthermore, the brush shape is angled sideways for better access to the T-area (the T-shaped area around your eyes, nose and lips).

ANTI-AGE EFFECT

The vibrations of the facial brush increase skin circulation and the natural collagen formation is stimulated by regular use. The result is an improved skin tone with greater luster, reduced pore size and less visible fine lines.

RECHARGABLE

This device can be charged with a USB charger.

PORTABLE

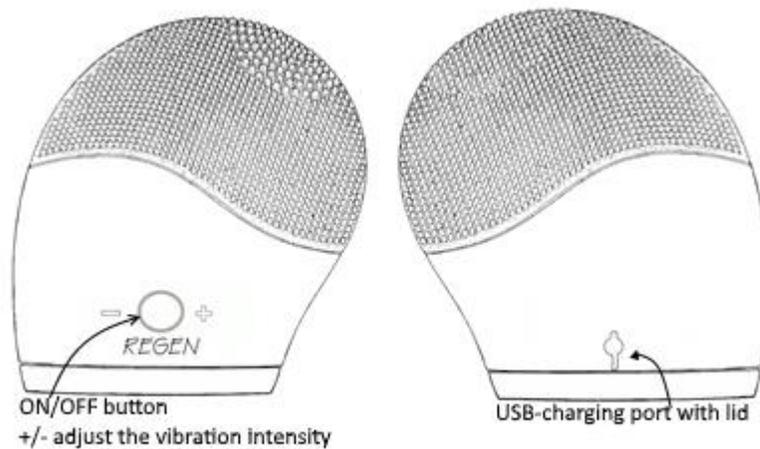

The REGEN S-VIBE is small enough to fit in your handbag, thus easy to bring with you.

REGEN S-VIBE

Application Method

HOW TO USE THIS PRODUCT

Our recommendation for you is to use this electronic silicone brush twice daily, once for cleansing and once for massage, approximately 2 minutes each time. Daily use is recommended for better anti-age effect. The vibrating silicone bristles help cleansing your skin from makeup residue and excess oil, while at the same time giving your skin a gentle massage. Blood circulation increases and the skin is regenerated from within. Your skin feels immediately fresh without becoming dry. Note that use of granular epilating/ scrubbing agents may damage the silicone material. When the brush is used for massage, you can either apply your favourite skin care product to your skin, or simply moisten your skin with water.

GETTING STARTED

- Press the button in the middle to start the brush. The brush is set to medium intensity.
- Adjust the vibration intensity with the (+) and (-) buttons.
- Massage/ clean your skin as shown below.
- Press the button in the middle to turn off the device.

REGEN S-VIBE

1. Massage/ cleanse your skin with soft circular motions. Start by moving the brush along the jaw towards your ear on either side.

3. Clean the area around your eyes with gentle movements, from the base of your nose towards your ears.

2. Clean your forehead from the middle to both sides with horizontal movements.

4. Finish the procedure with vertical movements on both sides of your nose.

Care and Maintenance

POWER SUPPLY INSTRUCTIONS

- Charge the device fully before its first use.
- Insert the DC power plug cable into the REGEN S-VIBE USB-port.
- Connect the USB side into a USB charger, e.g. cell phone charger or computer. The LED light flashes continuously during charging and turns off when the device is fully charged.

CLEANING THE BRUSH

- After each treatment, clean the brush under lukewarm water and use mild soap if necessary.
- Let the brush air dry.
- Your face cleansing brush is made of very durable medical silicone and will last for a long time. The silicone keeps the brush clean from bacteria and impurities.
- Do not clean the device during charging.

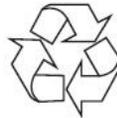

PRECAUTIONS FOR SAFE USE

- Do not use the brush with silicone dissolving products or granular epilating agents.
- Avoid exposing the device to direct sunlight.
- Stop the treatment immediately if your skin becomes irritated or develops a rash.
- Do not disassemble the brush.
- Keep out of reach and sight of children.

REGEN S-VIBE

RECYCLING

This device must be recycled as electronic waste and should not be thrown in ordinary household waste. By leaving the device to a recycling center, you contribute to a cleaner planet and a better environment.

Warranty

The right of reclaim is governed by the Consumer Purchase Act and entitles you as a customer to reclaim a product within a certain period of time. In addition to the right to reclaim, REGEN offers you a 2 year warranty on REGEN S-VIBE. The warranty is valid for 2 years from the date of purchase.

The warranty includes original errors or malfunctions that were present at the time of delivery. However, the warranty does NOT include wear and appearance changes from normal use. In addition, the warranty does not apply to any damage resulting from improper use, accidents or negligence. Disassembling the device is prohibited and will end your warranty as it will damage the product.
